

## Script for Security Company Tours

NOTE: Ensure security company personnel are not wearing/carrying any weapons prior to entering the JN-6 Guardhouse. This tour does not require dosimetry. Give package of maps from the general tour and question card.

JN-11	T	Take through JN-11 to show what a typical office area looks like.
Guardhouse:	T	Prior to entering guardhouse stop to look at security gate 1 and allow time to read signs.
	T	<b>Explain:</b> This is the West Jefferson North Site.
	T	<b>Explain:</b> Entire area owned by Battelle
	T	<b>Explain:</b> Second floor is the onsite Emergency Command Center
	T	Enter guardhouse - <b>explain:</b> radiation monitors are used to find radioactive contamination on personnel. Use when people are first time visitors to ensure they are not bringing contamination onsite, and upon exit to ensure personnel are not contaminated while onsite.
	T	Allow time to read signs in Guard House
	T	Exit Guard House
Outside:	T	<b>Point</b> out the area which will not be part of the project site.
	T	Walk toward JN-3 and JN-2 allowing time for visitors to look at security fence.
	T	<b>Explain:</b> Both fences are part of the project.
	T	<b>Explain:</b> Confined space entry marked areas are for underground tanks and utility runs.
JN-3	T	Enter the clean area of JN-3. Walk around to the former reactor area.
	T	<b>Point</b> out tornado shelter
JN-2	T	Take into JN-2. <b>Explain:</b> Made up of mostly offices.
	T	<b>Point</b> out second exit.
	T	Take to area of roll-up door - <b>point</b> out additional building exit.
JN-1	T	Prior to entry - stop on south porch. <b>Point</b> out the back area where filter bed located.
	T	Enter JN-1 control point - go no further
	T	Take to North side of JN-1. <b>Point</b> out second security gate. <b>Explain</b> - road goes to the filter bed area.

Exit security area. Return to trailer and **show** the filter bed tape so they can see security measures in that area.
